The FL and manual series, although not designed for AE photography, can be used on the Canon EF in the stopped-down metering mode. Lenses from a 7.5mm circular fish-eye lens all the way up to a 1200mm super-telephoto are available from Canon.

### Canon EF Instructions Manual

The Canon EF-M was an manual-focus 35mm film, SLR camera which used the Canon EF lens mount. It was introduced in 1991 for export to the non-Japanese market, and was the only manual focus camera in the EF line. It was not sold as part of the EOS range; the camera's official name was Canon EF-M rather than Canon EOS EF-M.

The range of official Canon EF-M lenses is ever-expanding, and doubling up the features of a regular lens is always beneficial. One of the most recent additions to the Cannon mirrorless lens series is the Canon EF-M 28mm f/3.5 Macro IS STM. This is the first official EF-M macro lens, and it's also relatively wide.
