The Safety and Chemical Engineering Education (SACHE) program, initiated in 1992, is a cooperative effort between the Center for Chemical Process Safety (CCPS) and engineering schools to provide teaching materials and programs that bring elements of process safety into the education of undergraduate and graduate students studying chemical and biochemical products and processes.

Undergraduate Process Safety Learning Initiative | AIChE

CCPS brings together manufacturers, government agencies, consultants, academia and insurers to lead the way in improving industrial process safety. CCPS member companies, working in project subcommittees, define and develop useful, time-tested guidelines that have practical application within industry. The project topics run the gamut of areas important to manufacturers and range from human ...

There must be a formal method to deal with the change in the chemical industry. The safety designed into the original process often occurs after a multidisciplinary design team has agonized for the optimum arrangement of process and layout. This process safety must not be jeopardized by modification schemes of poor quality.
