phototropism. the hormone auxin, in response to light, migrates from the light to the dark side of the shoot tip. The cells on the dark side now contain more auxin, which causes the cells on that side to elongate more rapidly than cells on the light side.

### CLEP Biology Flashcards | Quizlet

i hadn't taken biology since 9th grade either and I'm 30! The only thing I did have was my first semester in college (Jan 2016) I took environmental biology, so I knew some population biology and ecology terms like allopatric speciation and Darwin's evolution but I barely even get any of those types of questions on my test, it was all cell biology for humans and plants, and human processes.
