Autofocus systems also struggle in dim lighting, although that difficulty is often offset on the Nikon D3100, D5100, or D7000 by the AF-assist lamp, which shoots out a beam of light to help the camera find its focusing target. When you encounter situations that cause an autofocus hang-up, you can try adjusting the autofocus options.

How to Focus a Nikon DSLR Manually - dummies

„ Dynamic area focus tracking ” : The D7000 uses initially a single focus point that you can choose and when tracking a moving subject it will also use the surrounding 9, 21 or 39 focus points when your subject gets away from the initial focus points. These variants are for subjects that move predictably in different areas of the viewfinder.

Turning the DSLR Camera's Focus Assist Light On/Off | Nikon

For manual focusing in Live View mode on your Nikon D7100, set the Focus mode selector switch on the front-left side of the camera to M. If you're using a lens that has a focus method switch, set that switch to M as well. Then turn the lens focusing ring to focus. But note a few quirks:

Manual Focusing in Live View Mode on Your Nikon D7100 ...

All manual focus Nikkors are what we now call FX lenses - they were designed for use with 35mm film, and produce an image circle that will cover the "full frame" sensor of FX DSLRs. Of course, they will also work with Nikon DX cameras, subject to the normal 1.5X "crop factor" that is well-known to DX photographers.
