By using the Oracle Provisioning and Patch Automation Pack, the entire software stack can be provisioned including the operating system, middleware, and the Oracle Database Homes. Besides the software, Oracle Real Application Clusters (RAC) or non-RAC databases can also be cloned using this pack.

Overview of Oracle Enterprise Manager Management Packs

Service Packs are used to establish new service baselines for SQL Server. For each new baseline, Microsoft provides Cumulative Updates for around 12 months before the next Service Pack release. If we look at SQL Server 2016, the following Cumulative Updates and Services Packs were made available since the RTM release.
