Grade 12 Phototropism Practical

Plants also move toward the light. Seeds push little leaves up from the ground into the light. A house plant in a dark room will grow toward the light. This movement in response to light is called phototropism. When a plant moves toward the light, it's called positive tropism. When a plant moves away from light, it's called negative tropism.

Plant Phototropism Experiment

12 corn seeds Aluminum foil Small cookie sheet that fits inside the box (or another sheet of aluminum foil) 1 Straw Water. Procedure. Plant four corn seeds in each of the soil cups. Make sure they're evenly spaced, and plant them just a half inch under the dirt.

Grade 12 Term 3 Hypothesis Testing Practical Memorandum ...

The technique for this experiment helps students design an investigation to find out more about this tropic response. Students germinate seedlings in enclosed containers, with a coloured filter over the small hole allowing light in. Students predict which seedlings will demonstrate phototropism, and which will remain unaffected.
