### The American Cancer Society Guidelines for the Prevention ...

Joint guidelines from the American Cancer Society, American Society for Colposcopy and Cervical Pathology, and American Society for Clinical Pathology (ACS/ASCCP/ASCP) define adequate prior screening as 3 consecutive negative cytology results or 2 consecutive negative cotesting results within 10 years before stopping screening, with the most recent test occurring within 5 years. 6 The guidelines further state that routine screening should continue for at least 20 years after spontaneous ...

### Recommendation: Cervical Cancer: Screening | United States ...

Screening Guidelines. The American Cancer Society (ACS), ASCCP, and the American Society for Clinical Pathology (ASCP) have released guidelines for the prevention and early detection of cervical cancer. The guidelines generally advise a reduction in the number of tests women get over their lifetime to better ensure that they receive the benefits of testing while minimizing the harms, and include a preference for co-testing using the Pap test and HPV test for women age ages 30 to 65.

### Guidelines - ASCCP

Up to age 65, women should have either a Pap smear every three years, or a combination of a Pap smear and HPV test every five years. As with any health guidelines, it's important to discuss cervical cancer screening with your doctor, taking into account your unique risks for the disease.

### Goodbye to yearly pap smears for some women over 65 ...

After your Pap smear, you can go about your day without restrictions. Depending on the type of Pap testing you're undergoing, your doctor transfers the cell sample collected from your cervix into a container holding a special liquid to preserve the sample (liquid-based Pap test) or onto a glass slide (conventional Pap smear).

### Pap smear - Mayo Clinic

Follow-up pap smears are often conducted after an ASCUS test result. For women age 20 or younger who get an ASCUS Pap test result, the Pap test is redone in approximately 12 months. Adult women who get an ASCUS Pap test result typically get a repeat Pap test every six months.
