The glow plug wires are beneath the engine's valve covers. You will find one end attached to the top of the glow plug and the other attached to the engine. Remove the wire attached to the glow plug. Remove the small nut that holds the wires to the glow plugs with a wrench.

How to Change Glow Plugs: 15 Steps (with Pictures) - wikiHow

Many automotive mechanics simply use a hammer and punch to drive the old plug through the casting hole and into the block. They then turn the plug 90 degrees so that it can be grasped with pliers and pulled from the hole. This works most of the time, but on occasion will fall into the cooling passages and be impossible to retrieve.

Easy Removal of Freeze Plugs | It Still Runs

If you're working on a 4-cylinder engine, a straight 6, and most V8 engines, your job is probably very easy. Now's the time to take a look at your engine to see if you can easily reach all of the spark plug wires. Remove the "fashion cover" that hides all of the engine components, and see if you can see all of the plug wires and access holes.
