Jerome Bruner and the process of education - infed.org:

Jerome Bruner: Teaching, Learning and the Spiral Curriculum Sheldon Clark Jerome Bruner was one of the most important psychologists of the 20th century, though it is in the field of education that his influence has been most keenly felt. Two of his books, The Process of Education and Towards a Theory of Instruction, have come to be recognized as landmark works and reveal Bruner's particular view of the educational theory known as constructivism.

Jerome Bruner: Teaching, Learning and the Spiral ...

Bruner's position was that young children need to learn the underlying principals of different concepts – the structure of ideas – rather than to simply memorize their related facts and data. He championed learning through inquiry, and believed that the teaching and learning of any

Jerome Bruner, Teaching, Learning and the Spiral Curriculum

Bruner made great contributions to educational psychology — from cognitive psychology to learning theories. Jerome Bruner analyzed the implications of cultural psychology on education. With it, he sought to make changes in an educational system based on reductionist ideas and memorization.

Jerome Bruner's 9 Theories for Better Education ...

Jerome Bruner proposed that the main aim of education is to produce "autonomous, self-propelled learners." To understand how to achieve this goal Bruner studied cognitive growth from the "outside in" as well as the "inside out." Inside out.

Jerome Bruner - Developmental Approaches to Learning

Originator: Jerome Bruner (1915-) Keywords: Inquiry-based learning, constructivism Discovery Learning (Bruner) Discovery learning is an inquiry-based, constructivist learning theory that takes place in problem solving situations where the learner draws on his or her own past experience and existing knowledge to discover facts and relationships and new truths to be learned.

Discovery Learning (Bruner) - Learning Theories

Bruner's theory of scaffolding emerged around 1976 as a part of social constructivist theory, and was particularly influenced by the work of Russian psychologist Lev Vygotsky. Vygotsky argued that we learn best in a social environment, where we construct meaning through interaction with others.

Jerome Bruner On The Scaffolding Of Learning

Dr. Jerome Bruner, born in 1915, is an American psychologist whose work has become especially influential in the field of education. "The Process of Education," published in 1960, outlined a theoretical approach to education that has been widely adopted in schools and universities in America and the United Kingdom.

Jerome Bruner's Theory of Development: Discovery Learning ...

Bruner (1966) states that a theory of instruction should address four major aspects: (1) predisposition towards learning, (2) the ways in which a body of knowledge can be structured so that it can be most readily grasped by the learner, (3) the most effective sequences in which to present material, and (4) the nature and pacing of rewards and punishments.

Constructivist Theory (Jerome Bruner ...

Bruner identified that learning occurs through Enactive means (doing, which is action based), Iconic means (seeing, which is visual) and Symbolic means (abstract, which is in the form of 'codes' or symbols i.e. language). This Concrete, Pictorial, Abstract (CPA) approach lies at the heart of MNP. It enables a natural and supportive progression for learners as they develop their understanding and skills in maths.

The Theories of Jerome Bruner empower Maths Teachers and ...

Bruner states that what determines the level of intellectual development is the degree to which the child has received adequate instruction along with practice or experience. Therefore, the correct way to teach and explain, will allow a child to understand a general concept that at first is only understood by an adult.
