Journals By Subject Area - Springer

This paper examines a factor affecting why the interests of the older electorate often prevail in politics in developed countries with aging populations, namely the difference in issue salience related to governmental programs for the elderly. Analysis of data collected with a national electoral survey in Japan conducted at every national election between 1972 and 2016 (28 surveys) revealed ...

The Politics of Aging: Age Difference ... - link.springer.com

It is generally assumed that orthographic-phonological (O-P) consistencies are higher for Japanese kana words than for kanji words and that orthographic-semantic (O-S) consistencies are higher for kanji words than for kana words. In order to examine the validity of these assumptions, we attempted to measure the O-P and O-S consistencies for 339 kana words and 775 kanji words.

In this study, we propose a new method of Japanese word segmentation. Our method regards word segmentation as the classification problem and solves it by the decision list method. The advantage of our method is that it avoids the unknown word problem because it is a kind of character based method.

Deterministic Japanese Word Segmentation by Decision List ...

For example: Japanese \rightarrow Chinese, whereas m_{2} is set-equivalent to μ_{2} . If we just look at Japanese loanwords in Chinese, according to our Japanese Loanword List—comprising currently 1468 at least double confirmed Japanese loanwords—roughly 146 types (characters) or 16% of total 911 character types are different.

Characteristic residual (12–67 years) neuropathological features of 4 verified or suspected cases of Japanese B encephalitis (JBE) are reported. These features are summarized as: 1. unique distribution pattern of the main lesions, i.e. combination of lesions in the thalamus, substantia nigra and Ammon's horn.

Characteristic residual neuropathological features of ...

TIP: Journals often set a maximum word count for Abstracts, often 250 words, and no citations. This is to ensure that the full Abstract appears in indexing services. Keywords are a tool to help indexers and search engines find relevant papers. If database search engines can find your journal manuscript, readers will be able to find it too.

Title, Abstract and Keywords - Springer

Handwriting recognition is one of the challenging tasks in the area of pattern recognition and machine learning. Handwriting recognition has two flavors, namely, Offline Handwriting Recognition and Online Handwriting Recognition. Though, saturation level has been achieved in machine printed (Offline) character recognition. Presently, due to dramatical development in IT sector, touch-based ...

In these experiments, the effects of polysemy were examined as a function of word frequency for Japanese katakana words, words which have consistent character-to-sound correspondences. In the lexical decision task, an additive relationship was observed between polysemy and frequency (i.e., polysemy effects were identical for high and low ...

The effects of polysemy for Japanese katakana words ...

Pete Springer If someone were to ask me three words to describe myself, shy would not make the list. I'm also not one of those people who crave fame or attention. I've managed to get through sixty-one years flying

under the radar. That's the way I like it. I do have one of those last...

No, Not That Springer! - Pete Springer

Several studies have demonstrated that perceiving an action influences the subsequent processing of action verbs. However, which characteristics of the perceived action are truly determinant to enable this influence is still unknown. The current study investigated the role of the agent executing an action in this action-language relationship.
