Plug the DC plug into the wall outlet before you plug it into the Club Car. Connect the Club Car end of the 48 into the receptacle on the Club Car slowly. If you plug it in too fast, you could arc the current and fry your PowerDrive 48. Make sure that your battery pack is compatible with the PowerDrive 48. If the battery pack is not compatible, you could overheat the transformer in your PowerDrive 48.

Club Car charging question: first time charging a club car. Brand new batteries just installed. Pack read 48.3 volts fresh from store. After 2 hours pack reads 55.5 volts (that was an instant reading after unplugging charger so surly not actually that high) and charger reads 8 on meter Charger is hot to the touch.

### **Club Car charger very hot (new batteries)**

You may have a non-functioning OBC (onboard computer). Since the 1995, 48 volt Club Car's come with an OBC that regulates the batteries' charge. When you plug the charger into your Club Car, the OBC will tell the battery charger when to start and stop charging based on the voltage levels in your batteries. As a result, golf cart battery chargers for 48 volt Club Cars need a working OBC to get them to start charging. So, it is possible that your OBC is malfunctioning and it is not the golf ...

A Club Car battery charger usually comes with your electric Club Car golf cart. The two most common ones are for a 36V or a 48V - however each one of these can come in different amps. A higher amp charger charges batteries quicker. A golf cart battery charger can be specific to the make and year of the golf cart or universal.
