Cats hold a very special place in society. They are one of the most cherished companion animals in our country, with their stature rising to the level of family member in many American households. Despite their special standing, however, there were 18,619 cats used in research in 2018, according to the United States Department of Agriculture. This represents a 4% increase of cats used in research from 2017, and a 75% decrease since their peak in 1974.

## Cats in Research | National Anti-Vivisection Society

Cats All cats, from jungle cats to house cats, belong to the cat family, Felidae, order Carnivora. The cat family, Felidae, order Carnivora, contains about 36 species that are usually grouped into two to four genera, depending on the classification system used. According to one common system, four genera exist: Panthera (jaguar, leopard, lion, tiger), Neofelis (clouded leopard), Acinomyx (cheetah), and Felis (puma, lynx, and smaller cats such as the domestic cat, Pallas's cat, and the.
