subject is concerned with the deformation and strength of bodies of soil. It deals with the mechanical properties of the soil materials and with the application of the knowledge of these properties to engineering problems. In particular it is concerned with the interaction of structures with their foundation material. This includes both

Soil Mechanics and
Foundations Review:
When it comes to the
civil engineering then
we have to talk about
the soils and how they
behave under different
conditions. As the
name of the book is
saying that it is going
to be all about the soil
and the mechanics of
the soils etc.
