than the steam engine itself. The water and steam run through a continuous cycle of water boiled into steam, used in the engine, condensed back to water, and then pumped back into the boiler for reuse, a cycle first studied scientifically by the French engineer Sadi Carnot in 1824, about a century after the first steam engines had been built.

Mike Mulligan and His Steam Shovel is a children's book by Virginia Lee Burton. First published in 1939, in the wake of the Great Depression, it features Mike Mulligan, a steam shovel operator, and his steam shovel Mary Anne. It is considered a classic favorite of children's literature: based on a 2007 online poll, the National Education Association listed the book as one of its "Teachers' Top 100 Books for Children." An animated short film of the same name, directed by Michael Sporn, narrated b
