NBN Connection & Installation from Telstra
Telephone wiring for a phone outlet is typically either 1, 2 or 3 pairs (2, 4, or 6 conductor). Most cable nowadays is UTP (unshielded twisted pair). There may be instances where you may need to connect to or transpose from the old "quad" cable. The diagram below provides the transposition between these standards.

How to Wire a Phone Jack (Voice or Telephone RJ-11 thru RJ-14)
In the box, locate the cord with the red plug already connected to the Telstra Smart Modem and the yellow plug on the other end. Insert the yellow end into the yellow port on your NBN connection device for NBN FTTC or NBN connection box for NBN HFC customers, and ensure the device or box is switched on.

Telstra Business SIP
As mentioned above, Telstra and Optus are now installing this type of socket in homes. The RJ-45 is a single-line jack for digital transmission over ordinary phone wire, either untwisted or twisted. The interface has eight pins or positions. For connecting a modem, printer, or a data PABX at a data rate up to 19.2Kbps, you can use untwisted wire.
